Mathematics @ Dinnington

KIRFs

Key Instant Recall Facts

To help develop children's fluency in Mathematics, we have identified some Key Instant Recall Facts that should be learnt off by heart each half term.

Children will practice these facts in class, but would benefit from regular practice at home 3 time a week as well. At the end of each half term they will be assessed on how well they achieve each fact.

Please see attached lists of KIRFs which are aligned to the Maths curriculum we deliver.

<u>Top Tips</u>

The secret to success is practising little and often. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

Year 3 Block 1 KIRFs

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

I know all my facts for each number up to 20.

+	0	1	2	3	4	5	6	7	8	9	10
0	0+0	0+1	0+2	0+3	0+4	0+5	0+6	0+7	0+8	0+9	0+10
1	1+0	1+1	1+2	1+3	1+4	1+5	1+6	1+7	1+8	1+9	1+10
2	2+0	2+1	2+2	2+3	2+4	2+5	2+6	2+7	2+8	2+9	2+10
3	3+0	3+1	3+2	3+3	3+4	3+5	3+6	3+7	3+8	3+9	3+10
4	4+0	4+1	4+2	4+3	4+4	4+5	4+6	4+7	4+8	4+9	4+10
5	5+0	5+1	5+2	5+3	5+4	5+5	5+6	5+7	5+8	5+9	5+10
6	6+0	6+1	6+2	6+3	6+4	6+5	6+6	6+7	6+8	6+9	6+10
7	7+0	7+1	7+2	7+3	7+4	7+5	7+6	7+7	7+8	7+9	7+10
8	8+0	8+1	8+2	8+3	8+4	8+5	8+6	8+7	8+8	8+9	8+10
9	9+0	9+1	9+2	9+3	9+4	9+5	9+6	9+7	9+8	9+9	9+10
10	10+0	10+1	10+2	10+3	10+4	10+5	10+6	10+7	10+8	10+9	10+10

They should also be able to work out missing number/symbol problems involving this.

For example $_$ + 1 = 9 4 + $_$ = 13 Children also need to know the inverse of these e.g 4 + 9 = 13 so 13 - 9 = 4 or 13 - 4 = 9

Possible Learning Activities

You don't need to practise them all at once: perhaps you could have a fact family of the day. If you would like more ideas, please speak to your child's teacher. Games- Use sumdog addition facts to practise at www.sumdog.com

Flash Cards- Hold up flash cards with the facts on them.

<u>Matching pairs</u>- Find all the pairs that make a given number

Year 3 Block 2 KIRFs

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

Number bonds to 100

Some examples:

60 + 40 = 100	37 + 63 = 100	Key Vocabulary		
40 + 60 = 100	63 + 37 = 100	What do I add to 65 to make		
100 - 40 = 60	100 - 63 = 37	1001		
100 - 60 = 40	100 - 37 = 63	What is 100 take away 6?		
		What is 13 less than 100?		
75 + 25 = 100 48 + 52 = 100		How many more than 98 is		
25 + 75 = 100	52 + 48 = 100	100?		
100 - 25 = 75	100 - 52 = 48	What is the difference between		
100 - 75 = 25	100 - 48 = 52	89 and 100?		

This list includes some examples of facts that children should know. They should be able to answer questions including missing number questions e.g. $49 + \bigcirc = 100 \text{ or } 100 - \bigcirc = 72$.

Possible Learning Activities

<u>Buy one get three free</u> - If your child knows one fact (e.g. 8 + 5 = 13), can they tell you the other three facts in the same fact family?

<u>Use number bonds to 10</u> - How can number bonds to 10 help you work out number bonds to 100?

<u>Play games</u> – There are missing number questions at www.conkermaths.com . See how many questions you can answer in just 90 seconds. There is also a number bond pair game to play

Year 3 Block 3 KIRFs

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

Multiplication and division facts for the 3 times table

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

 $3 \times 1 = 3$ $1 \times 3 = 3$ 3 + 3 = 13 + 1 = 3 $3 \times 2 = 6$ $2 \times 3 = 6$ $6 \div 3 = 2$ $6 \div 2 = 3$ $3 \times 3 = 9$ $3 \times 3 = 9$ $9 \div 3 = 3$ $9 \div 3 = 3$ $12 \div 4 = 3$ $3 \times 4 = 12$ 4 × 3 = 12 12 ÷ 3 = 4 $3 \times 5 = 15$ 5 × 3 = 15 15 ÷ 3 = 5 $15 \div 5 = 3$ $3 \times 6 = 18$ 6×3=18 18÷3=6 $18 \div 6 = 3$ 3 × 7 = 21 7 × 3 = 21 21 ÷ 3 = 7 $21 \div 7 = 3$ 3 × 8 = 24 8 × 3 = 24 24 ÷ 3 = 8 $24 \div 8 = 3$ $3 \times 9 = 27$ 9×3=27 27÷3=9 $27 \div 9 = 3$ 3 × 10 = 30 10 × 3 = 30 30 ÷ 3 = 10 $30 \div 10 = 3$ 3 × 11 = 33 11 × 3 = 33 33 ÷ 3 = 11 $33 \div 11 = 3$ 3 × 12 = 36 12 × 3 = 36 36 ÷ 3 = 12 $36 \div 12 = 3$

Key Vocabulary

What is 3 multiplied by 8?

What is 8 times 3? What is 24 divided by 3?

They should be able to answer these questions in any order, including missing number

questions e.g. $3 \times \bigcirc = 18$ or $\bigcirc \div 3 = 11$.

Possible Learning Activities

<u>Play TTRS</u>

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>Buy one get three free</u> – If your child knows one fact (e.g. $3 \times 5 = 15$), can they tell you the other three facts in the same fact family? Warning! – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra. E.g. $3 \times 12 = 36$. The answer to the multiplication is 36, so $36 \div 3 = 12$ and $36 \div 12 = 3$ <u>Games</u> Use sumdog tables practise at www.sumdog.com

Year 3 Block 4 KIRFs

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

Multiplication and division facts for the 4 times table

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

$4 \times 1 = 4$	$1 \times 4 = 4$	$4 \div 4 = 1$	$4 \div 1 = 4$
4 × 2 = 8	$2 \times 4 = 8$	8 ÷ 4 = 2	8 ÷ 2 = 4
4 × 3 = 12	3 × 4 = 12	$12 \div 4 = 3$	$12 \div 3 = 4$
$4 \times 4 = 16$	4 × 4 = 16	$16 \div 4 = 4$	$16 \div 4 = 4$
$4 \times 5 = 20$	$5 \times 4 = 20$	$20 \div 4 = 5$	$20 \div 5 = 4$
$4 \times 6 = 24$	6 × 4 = 24	$24 \div 4 = 6$	$24 \div 6 = 4$
4 × 7 = 28	7 × 4 = 28	28 ÷ 4 = 7	$28 \div 7 = 4$
4 × 8 = 32	8 × 4 = 32	32 ÷ 4 = 8	$32 \div 8 = 4$
$4 \times 9 = 36$	9 × 4 = 36	36 ÷ 4 = 9	$36 \div 9 = 4$
$4 \times 10 = 40$	$10 \times 4 = 40$	$40 \div 4 = 10$	$40 \div 10 = 4$
4 × 11 = 44	$11 \times 4 = 44$	$44 \div 4 = 11$	$44 \div 11 = 4$
$4 \times 12 = 48$	$12 \times 4 = 48$	48 ÷ 4 = 12	48 ÷ 12 = 4

Key Vocab	oulary
-----------	--------

What is 4 multiplied by 6?

What is 8 times 4?

What is 24 divided by 4?

They should be able to answer these questions in any order, including missing number questions e.g. $4 \times \bigcirc = 16$ or $\bigcirc \div 4 = 7$.

Possible Learning Activities

Play TTRS

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable.

<u>What do you already know?</u> – Your child will already know many of these facts from the 2, 3, 5 and 10 times tables.

<u>Double and double again</u> – Multiplying a number by 4 is the same as doubling and doubling again. Double 6 is 12 and double 12 is 24, so $6 \times 4 = 24$.

<u>Buy one get three free</u> – If your child knows one fact (e.g. $4 \times 5 = 20$), can they tell you the other three facts in the same fact family? Warning! – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study

fractions, decimals and algebra. E.g. $4 \times 12 = 48$. The answer to the multiplication is 48, so $48 \div 4 = 12$ and $48 \div 12 = 4$

<u>Games</u> Use sumdog tables practise at www.sumdog.com

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

Multiples of 50 and 100

	Children need to be	able to count in 50s	Key Vocabulary	
	1x50=50	50 ÷ 50=1	How many 50s make 300?	
	2x50=100	100 ÷ 50=2	Multiply 50 by 6?	
	3x50=150	150 ÷ 50=3	What are 4 lots of 50?	
	4x50=200	200 ÷ 50=4		
	5x50=250	250 ÷ 50=5		
	6x50=300	300 ÷ 50=6		
	7x50=350	350 ÷ 50=7		
	8x50=400	400 ÷ 50=8		
	9x50=450	450 ÷ 50=9		
	10x50=500	500 ÷ 50=10		
They sh 150, 200 Childrer 1x100= 2 x100 3 x 100 4 x 100 5 x 100	ould als0 be able to coun 0,,, 350 n need to be able to coun 100 0 = 200 0 = 300 0 = 400 0 = 500	t in 50s in sequences e t in 100s up to 10000	•g eg	
They sh 100,	ould be able to count in 1 , 300,, 500,,	100s in sequences e.g 700		
Possi	ble Learning Acti	vities		
•	Say the next 3 numbers – Odd one out / spot the m counts	children continue a se istake – children ident	quence started by an adult ify the error or odd one out as an a	dult
•	Sequencing – print off the	e numbers can pupils p	ut them in the correct order	

 Snap – match multiplication facts with division facts using the same family of numbers eg 3x50=150 goes with 150 divided by 3 = 50

Year 3 Block 6 KIRFs

By the end of this block, children should know the following facts. The aim is for them to recall these facts instantly and accurately

Multiplication and division facts for the 8 times table

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

8×1=8 $1 \times 8 = 8$ 8 ÷ 8 = 1 $8 \div 1 = 8$ $8 \times 2 = 16$ $2 \times 8 = 16$ $16 \div 8 = 2$ $16 \div 2 = 8$ 8×3=24 3×8=24 $24 \div 8 = 3$ $24 \div 3 = 8$ 8 × 4 = 32 4 × 8 = 32 $32 \div 8 = 4$ $32 \div 4 = 8$ $40 \div 5 = 8$ 8 × 5 = 40 5 × 8 = 40 40 ÷ 8 = 5 8 × 6 = 48 6 × 8 = 48 48 ÷ 8 = 6 $48 \div 6 = 8$ 8 × 7 = 56 7 × 8 = 56 56 ÷ 8 = 7 $56 \div 7 = 8$ 8 × 8 = 64 8 × 8 = 64 64 ÷ 8 = 8 $64 \div 8 = 8$ 8×9=72 9×8=72 72÷8=9 $72 \div 9 = 8$ 8 × 10 = 80 10 × 8 = 80 80 ÷ 8 = 10 $80 \div 10 = 8$ 8 × 11 = 88 $11 \times 8 = 88$ 88 ÷ 8 = 11 $88 \div 11 = 8$ $8 \times 12 = 96$ $12 \times 8 = 96$ $96 \div 8 = 12$ $96 \div 12 = 8$

Key Vocabulary

What is 8 multiplied by 6?

What is 8 times 8?

What is 24 divided by 8?

They should be able to answer these questions in any order, including missing number questions e.g. $8 \times \bigcirc = 16$ or $\bigcirc \div 8 = 7$.

Possible Learning Activities

<u>Play TTRS</u>

<u>Songs and Chants</u> – You can buy Times Tables CDs or find multiplication songs and chants online. If your child creates their own song, this can make the times tables even more memorable. <u>Double your fours</u> – Multiplying a number by 8 is the same as multiply by 4 and then doubling the answer. $8 \times 4 = 32$ and double 32 is 64, so $8 \times 8 = 64$.

<u>Five six seven eight</u> – fifty-six is seven times eight (56 = 7×8).

Buy one get three free – If your child knows one fact (e.g. $8 \times 5 = 40$), can they tell you the other three facts in the same fact family? Warning! – When creating fact families, children sometimes get confused by the order of the numbers in the division number sentence. It is tempting to say that the biggest number goes first, but it is more helpful to say that the answer to the multiplication goes first, as this will help your child more in later years when they study fractions, decimals and algebra. E.g. $8 \times 12 = 96$. The answer to the multiplication is 96, so $96 \div 8 = 12$ and $96 \div 12 = 8$

Games Use sumdog tables practise at www.sumdog.com
